Western	1,906	87.6	85.3 - 89.9
York	1,664	86.7	84.3 - 89.1

* Defined as an adequate or adequate-plus rating on the Kotelchuck Adequacy of Prenatal Care Utilization Index.

† Percents are based on live births with known prenatal care initiation and adequacy.

CI: Confidence Interval.

Note: Group totals might not equal overall total because some births were missing group information. For example, births with missing maternal age were excluded from the maternal age analysis.

County and District numbers are based on the residence of the mother.

Data Source: Birth certificate datasets obtained from the Office of Data, Research and Vital Statistics, Maine Center for Disease Control and Prevention.
